

Garden Angel with Diane Enger

Thursday, June 20th, 1 to 4

\$45 A3L members, \$55 nonmembers, plus \$15 material fee includes glass, prepared glass components, hanger, garden stake and firing

In this workshop we will be using a variety of glass and glass elements to create a "Garden Angel" to watch over your flowers and shrubs as they grow throughout the season.

Our base will be created with a pattern and then you will be able to let your creativity go wild as you design your angel. There will be some glass cutting involved and we will review directions on cutting glass and practice glass will be available. Glass enamels will also be available to add additional decoration to your design.

Our "Angel" will measure 4 inches x 10 inches and hang on a stake that will go into the ground.

She will be a great addition to your garden.
